

mains water fountain

BLIZZARD

Stylish water fountains

These attractive yet robust water fountains provide consumers with a continuous supply of high quality filtered mains water. This new water fountain has been designed to be robust, safe and attractive with all the benefits of point-of-use technology. The high impact plastic body, drinking bubbler tap and bottle filling swan neck make it the ideal hydration station.

All our coolers are installed by WRAS trained and CRB registered employed engineers who ensure a professional service that meets the current BWCA mains drinking water regulations.

Specifications

Reservoir capacity	2 litres
Cooling capacity	24 ltr/hr @ 15 deg
Power requirement	220 – 240 V 50Hz
Power consumption cold	180 W
Dimensions- W x D x H mm	410 x 410 x 1180
Weight	28 kg
Drainage	Full drainage to waste mandatory
Security	Base and wall mounting brackets
Installation kit	See filters and fittings
Refrigerant	Environmentally friendly R134a

Range features:

- Available as free standing machines with or without chilling unit and filtration system.
- With simple cold dispense fountain and swan neck filler for direct consumption, cups and bottles.
- We fit in-line filtration systems to remove any impurities from your mains water supply. The filter system is fitted inside the base cabinet for a neat and tidy installation.
- Auto temperature controller acts as a thermostat to ensure cold water is kept at a refreshing temperature.
- With simple drainage to mains waste for minimal servicing.
- Our installation includes advanced water block protection that switches off the water supply if on the rare occasion a continuous leak is detected.
